

Protest The Bush Plan

In his recent speech, President Bush accused the Palestinian Authority of sponsoring “terrorism”. He demanded that the Palestinians choose a new leadership before they ‘qualify’ for an independent state.

This is an attempt by Bush to deny the Palestinians the Right of Self- determination as a nation. At the same time, Bush continues to call Ariel Sharon, the architect of the massacres of Sabra and Shatila, a ‘man of peace’.

Once again, Bush ignored the fact that the brutal Israeli occupation and denial of the Palestinians’ most basic human rights- including the right of return for 5 million refugees- *is the source of the problem.*

Moreover, the US continues to give more than \$5 Billion in aid to Israel every year. Bush continues to support Israel’s brutal war on the Palestinian people *while* the US Congress pass anti-Palestinian Resolutions.

But, we will not be silent...

We stand in solidarity with the Palestinians...
